EDUCATION

San Diego State University — Fowler College of Business, San Diego, CA
Bachelor of Science — Finance

Expect Graduation: May 2027

San Diego Miramar College — San Diego, CA
Associate of Science — Business Administration

Graduated: 2024

PROFESSIONAL EXPERIENCE

Coronado Historical Association — Coronado, CA
Executive & Finance Assistant

May 2026 – Present

- Manage recurring accrual-basis accounting workflows in QuickBooks Online, including transaction classification, journal entries, accounts payable, bank and credit-card reconciliations, and investigation of discrepancies to maintain accurate general-ledger records.
- Prepare monthly financial statements, supporting schedules, cashflow and budget reporting, and Board-level financial materials, translating accounting activity into information used for planning, oversight, and executive decision-making.
- Maintain audit-ready financial records and internal controls by reconciling account activity, organizing source documentation, tracking restricted and unrestricted funds, and ensuring transactions are properly supported, classified, and traceable.

Lightedge Solutions — San Diego, CA
Data Center Operations Technician / NOC Technician

Nov 2020 – Present

- Execute data-center infrastructure deployments involving servers, rack-and-stack installations, structured cabling, storage, network connectivity, and virtualization, providing 5+ years of firsthand exposure to the physical infrastructure supporting cloud computing and the expanding AI compute ecosystem.
- Operate across VMware, storage, networking, power, cooling, and critical-facility systems, developing practical insight into the compute, connectivity, capacity, energy, and reliability requirements driving AI data-center investment and infrastructure demand.
- Coordinate approximately 20–40 daily infrastructure changes, incidents, and service requests while supporting 99.9%+ availability, building direct operating perspective on uptime, capacity constraints, hardware deployment cycles, asset utilization, and the operational risks behind mission-critical digital infrastructure.

United States Army — Fort Campbell, KY
Supply Specialist

Nov 2015 – May 2019

- Coordinated fuel supply operations supporting aviation and ground missions, ensuring timely distribution of petroleum products to maintain operational readiness.
- Managed inventory tracking, storage, accountability, and documentation for inventory, equipment, and mission-critical supplies across daily logistics operations.
- Supported operations planning by coordinating deliveries, equipment movement, supply requests, and aviation support documentation.

Financial Management Technician

- Assisted with tracking and reporting of \$10M+ in operational expenditures supporting unit financial operations.
- Maintained financial records, processed transactions, and ensured proper documentation for reporting and compliance
- Supported reconciliation of financial transactions and assisted with tracking expenses and budgets
- Prepared financial reports and assisted leadership with budgeting and cost monitoring.

Wilgus Associates — Bethany Beach, DE
Junior Reconciliation Accountant

Jun 2014 – Jul 2015

- Maintained ledger accounts, processed transactions, and performed bank reconciliations to ensure accuracy
- Investigated discrepancies between financial reports and supporting documentation.
- Assisted with month-end close, including reconciliation documentation and reporting support
- Implemented automated reconciliation processes that reduced reconciliation time by 50%.
